## PROJECTS

### Eco-Optimized Packaging Transition

We partnered with a key client to redesign the packaging of their best-selling products with a focus on sustainability and operational efficiency. The initiative involved transitioning to plastic-free materials and optimizing primary and secondary packaging to reduce air. This resulted in improved profit margins through raw material reduction while optimizing logistics, production and transportation costs. Contributed to 20% sales growth, long-term brand loyalty and sustainability goals.

### Category Expansion Initiative

Developed internal branding for multiple product collections to expand our category within the division. The scope included creating cohesive visual identities, structural packaging designs, and artworks, along with commercial decks for client engagement. The initiative strengthened market presence, attracted new business opportunities, and drove revenue growth by enhancing product appeal and expanding partnerships.
